SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is requesting clearance for the collection of data concerning the Fertility and Birth Expectations Supplement to be conducted in conjunction with the June 1998 CPS. The Census Bureau sponsors the supplement questions, which were previously collected in June 1995, and have been asked periodically since 1971.

This survey provides information used mainly by government and private analysts to project future population growth, to analyze child spacing, and to aid policy makers in their decisions affected by changes in family size and composition. Past studies have discovered noticeable changes in the patterns of fertility rates, family structures, premarital births, and the timing of the first birth. Potential needs for government assistance such as aid to families with dependent children, child care, and maternal health care for single parent households can be estimated using CPS characteristics matched with fertility data. The birth expectations data also assist researchers and analysts who explore issues such as postponement of childbirth because of education or employment responsibilities.

II. Method of Collection

The fertility and birth expectations information will be collected by both personal visit and telephone interviews in conjunction with the regular June CPS interviewing. All interviews are conducted using computer-assisted interviewing.
